

[GETNET]Roteiro PSU

Objetivo do documento é manter um guia de aplicação de PSU. Nos comentários poderemos deixar os erros encontrados afim de facilitar a vida de quem pegar esta atividade.

1- Validações pré-PSU

Objetivo deste tópico é tirar um espelho do banco de dados antes de aplicar o PSU. O primeiro bloco abaixo refere-se ao banco de dados Primário de um Data Guard:

```
col HOST_NAME format a30
set lines 230
col COMP_NAME format a55
set pages 900
col DESCRIPTION format a65
col ACTION_TIME format a29
col COMMENTS format a40
col ACTION format a9
col NAMESPACE format a9
col ID format 99999999
```

```
select instance_name, host_name, version, status, open_mode, database_role, switchover_status from gv$instance, v$database;
```

Para o erro abaixo, solução encontrada pelo marcelo

```
bash-4.3$ ./datapatch -verbose
```

```
SQL Patching tool version 12.1.0.2.0 Production on Tue May 11 01:17:02 2021
```

```
Copyright (c) 2012, 2016, Oracle. All rights reserved.
```

```
Log file for this invocation: /u01/app/oracle/cfgtoollogs/sqlpatch/sqlpatch_14549046_2021_05_11_01_17_02/sqlpatch_invocation.log
```

```
Connecting to database...OK
```

```
Bootstrapping registry and package to current versions...done
```

```
Queryable inventory could not determine the current opatch status.
```

```
Execute 'select dbms_sqlpatch.verify_queryable_inventory from dual'
```

```
and/or check the invocation log
```

```
/u01/app/oracle/cfgtoollogs/sqlpatch/sqlpatch_14549046_2021_05_11_01_17_02/sqlpatch_invocation.log
```

```
for the complete error.
```

```
Prereq check failed, exiting without installing any patches.
```

```
Please refer to MOS Note 1609718.1 and/or the invocation log
```

```
/u01/app/oracle/cfgtoollogs/sqlpatch/sqlpatch_14549046_2021_05_11_01_17_02/sqlpatch_invocation.log
```

Solução:

1) erro no datapatch -verbose – verify_queryable_inventory returned ORA-20001: Latest xml inventory is not loaded into table

2) Verificar o arquivo /u01/app/oracle/product/12.1.0/dbhome_1/QOpatch/qopatch_log.log , o erro encontrado foi:

```
KUP-04004: error while reading file /u01/app/oracle/product/12.1.0/dbhome_1/QOpatch/qopiprep.bat
```

```
KUP-04017: OS message: Error 0
```

```
KUP-04017: OS message: Argument(s) Error... Cannot use file "/u01/app/oracle/product/12.1.0/dbhome_1/QOpatch/xml_file.xml" to generate XML output.
```

```
Specify path/filename and make sure
```

```
KUP-04118: operation "pipe read", location "skudmir"
```

3) Copiar o arquivo /u01/app/oracle/product/12.1.0/dbhome_1/QOpatch/qopiprep.bat para um .old só pra ter um backup.

4) Dar um chmod 755 /u01/app/oracle/product/12.1.0/dbhome_1/QOpatch/qopiprep.bat

5) Vi /u01/app/oracle/product/12.1.0/dbhome_1/QOpatch/qopiprep.bat

Inserir isso no inicio do arquivo #!/usr/bin/ksh93 retirando o #!/usr/bin

6) Abrir o sqlplus e rodar a seguinte query

```
SQL> select dbms_sqlpatch.verify_queryable_inventory from dual ;
```

```
VERIFY_QUERYABLE_INVENTORY
```

```
OK
```

tem que retornar o OK

```
7) cd $ORACLE_HOME/OPatch
```

```
8) ./datapatch -verbose
```

```
bash-4.3$ ./datapatch -verbose
```

```
SQL Patching tool version 12.1.0.2.0 Production on Tue May 11 01:46:20 2021
